

Repairs servicing overhauls

Service/Overhauls

Thompson Valves (IVP) offers a full overhaul and service facility at our Poole head office.

We can overhaul and service any IVP product, from a single stand alone product, to a much more bespoke intricate special unit such as a 2 stage pressure reduction station manifold, to meet your exact requirements.

All work is carried out by experienced IVP Technicians to the same standard as a new build, to emphasise our high level of workmanship and commitment to you, this service includes a new full 12 month warranty, on all products.

This service includes;

- A strip and inspection service at a nominal charge
- A quotation for carrying out the required work
- An overhaul to include replacements of all stress related parts, soft and hard seals, tested and fully cleaned.
- A full 12 months standard warranty
- Packaging and delivery back to place of use, or your own premises
- To supply seal kits to allow you to carry out your own servicing of products, 12 month warranty excluded
